Whether you’re a longtime fan or a newcomer, you’ll find a fresh perspective on this classic track.

The Song’s Origins and Release

“Who Can It Be Now?” was released in 1981 as part of the album *One Night Stand* by the iconic rock group The Who. Though the band had already cemented their status with hits like “My Generation” and “Baba O’Riley,” this song marked a return to a more raw, energetic sound after a period of experimentation. The track was written by the band’s guitarist, Pete Townshend, and produced by the legendary engineer, Glyn Johns. It quickly climbed the charts, reaching the top 20 in several countries and becoming one of the band’s most enduring songs.

Background and Inspiration

Townshend has often spoken about how the song was inspired by the feeling of being on the brink of a major life change. “I wanted to capture that moment when you’re standing on the edge, looking out and wondering if someone is coming or if you’re just alone,” he said. The lyrics reflect this emotional tension, with the narrator questioning who might be arriving at their door and what that arrival could mean for their future.

Recording Process

The recording sessions for “Who Can It Be Now?” were intense. The band aimed to recreate the spontaneous energy of their live performances in the studio. They recorded the track in just a few takes, allowing the raw emotion to shine through. The result is a powerful blend of driving drums, soaring guitar riffs, and Townshend’s unmistakable vocal delivery.

The Artist Behind the Song

While The Who is a collective, the creative force behind “Who Can It Be Now?” is Pete Townshend. Known for his visionary songwriting and theatrical stage presence, Townshend has penned some of the most iconic rock anthems of the 20th century. His songwriting style often incorporates complex narratives, social commentary, and an exploration of personal identity.

Townshend’s Songwriting Style

Townshend’s approach to songwriting is deeply introspective yet universally relatable. He frequently uses metaphor and vivid imagery to convey complex emotions. In “Who Can It Be Now?” this manifests in the way the narrator’s internal dialogue is mirrored by the external uncertainty of a mysterious visitor.

Collaboration with the Band

The Who's dynamic as a band is essential to the success of any track. Each member brings their own flair—Keith Moon's explosive drumming, Roger Daltrey's powerful vocals, and John Entwistle's inventive bass lines. Together, they create a sound that is both cohesive and explosive, allowing the lyrical content to take center stage.
